

Equal and almost Equal Widths/Lengths + Patterns of coordinated Swirling in the downed crop

(with photographic documentation of all this)

55 m long x 21 m wide

$$5 = 15 = 19 = (\frac{1}{5}) 8$$

$$6 \geq 13 \geq 18$$

1 to 9 ≈ 11 to 13

width 2 ≈ 3 ≈ 10 ≈ 11 ≈ 12 ≈ 13 ≈ 15 ≈ 20

path start to 9 = path finish to 9 = 13 to center of 8

- = swirling overlaps the central path
- = swirling begins at path's edge
-))) = bunches of corn stalks (wheat) curved upwards into the field (no sharp boundary here)

Crop Circle formation near Stenstrup, Odsherred, Sjælland, Denmark - discovered July 29, 2026
